

Press Release

October 2, 2006

PM-Global K.K. (PMG) and RiskManage Co., Ltd. (RM) are pleased to announce they have launched an alliance to provide Disaster Recovery/Business Continuity Management (DR/BCM) workshops and consulting services. These services include the ISO27001 solution for Information Security Management System (ISMS). Japanese organizations must implement DR and ISMS solutions to be in compliance of the upcoming JSOX Japanese regulations.

**Disaster Recovery/Business Continuity Management (DR/BCM):**

You are not sure when a disasters such as weather, flood disaster, earthquake, geologic hazards, and medical disaster, (e.g. SARS), and man-made disasters, including terrorism, occurs. So, you must be prepared with a comprehensive DR/BCM plan to recover and continue your business operation.

PMG and RM provide services, tools and methodologies to help you plan your response; manage your response; and recover from a disaster. According to an American report, 43% of companies who experienced a disaster were out of business in two years due to lack of DR preparedness.

**ISO27001 Information Security Management System (ISMS)**

Your regulatory environment is increasingly complex. You are facing evolving and integrated threats to your information assets. You must protect your information assets by complying with business and regulatory obligations. Your challenge is to comply with an uncertain and changing compliance environment. Your risks are the penalties for failure to comply. You may be faced with fines and damage to your reputation and brand. ISO27001 provides a systematic framework to avoid these risks.

PMG and RM provide cost-effective implementation consulting services and seminars that focus on information confidentiality; availability and integrity for the ISO27001 framework.

**J-SOX Regulations**

Japan's J-SOX regulations are schedule to become law April 1, 2008. Detailed J-SOX corporate governance and internal control requirements will be announced before the end of 2006.

Objectives of J-SOX include: effectiveness and efficiency of operations; reliability of financial reports; compliance with laws and regulations. PMG and RM provide a J-SOX framework that includes DR/BCM and ISMS solutions.
